HUB FUNNEL

Northland Process Piping fabricates Hub Funnels to utilize your full capacity of existing or new hub drains. Various sizes are available upon your request; unique backslash allows for hanger support.

VALVE MANIFOLD

Manifolds built to customer specifications using Northland Process Piping supplied valves or customer supplied valves.

Manifolds are fabricated on surface ground level welding table, welds performed with orbital tube welder ground and polished to required finish.

IN-LINE FILTER/STRAINER

For keeping your product free of particles. Strainers are made of 316L Stainless Steel with

#4 finish inside and out and built to 3A standards.

- While remaining in-line the screen assembly maybe removed and cleaned.
- Northland Process Piping in-line strainer is designed to provide minimal pressure drops with high flow rates.
- 8" diameter body, 8.3 Gal. cavity with 4 square feet of filter surface which uses 5 to 800 micron replaceable filter sock and has a 41% open area.
- Inlet/outlet sizes available: 2", 2 1/2", 3", 4" & 6"
